EXAMINER'S COMMENTS

1. The Response of October 5, 2004 canceled claims 13 and 57 and added new claims 96-109. Accordingly, the claims now pending are claims 1-12, 14-56 and 58-109.
 2. The telephonic interview of September 30, 2004 is noted. In view of said interview and the amendments, arguments and submitted article in the Response of October 5, 2004, the Section 112 rejection of record is overcome. No prior art was applied in the last Office action. The patentability of the present chemically defined valency platform molecules is in the required molecular weight of the polyethylene oxide group being at least 18,000 Daltons and said valency platform molecule being defined as having a polydispersity less than 1.2 or being defined by specific formulas. The prior art and applicants' related applications/patents neither disclose nor teach these specific platform molecules or their corresponding conjugates. See the present specification for a discussion of the improved properties of the present products.
 3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
